STRUCTURE

The Osmose range is based on a design where the 2 legs are connected by a modesty panel, making the assembly extremely strong. The panels used for the Osmose range are made from **Structurex®**. The height of the tops in the Osmose range is 74 cm.

STRUCTUREX®

The Osmose tops consist of 25 mm thick panels, protected by 2 mm thick, chlorine-free, shock-proof edging. The straight tops are also available in version post formed user side, L160 and L180.

STRUCTUREX® panels are manufactured on a fully automated production line. They are PEFC labelled 25mm counterbalanced melamine panels with anti-reflection treatment, density 680KG/m³, (± 5 %), complying with the requirements of the Centre Technique Du Bois Et De L'Ameublement (CTBA).

OSMOSE PEDESTAL

The Osmose pedestals stand out from the other pedestal ranges with their curved tops, in perfect harmony with the Osmose design.

THESE PEDESTALS ALSO FEATURE:

- Robust structure: 16 mm framed and glued with metal inserts
- Optimum user comfort: Metal drawer sides and metal runners, 5th anti-tilt caster on drawer for suspension filing, removable pen tray
- Heavy-duty drawers: up to 30 kg
- Security provided by centralised locking

METAL LEG

The Osmose metal leg consists of a metal base and a metal sheet upright finished in epoxy paint. Each metal leg has 2 screw jacks.

CABLE CHANNELLING SOLUTIONS

The Osmose cable channelling solutions apply to 3 different levels:

- 1- The tops have 80 mm dia. cable ports.
- 2- There is a horizontal gutter as an option.
- 3- Vertical circulation for cables is provided:
 - For the metal leg, by means of a plastic duct inside the leg.
 - For the panel and wood cantilever legs: 80 mm dia. cable ports, channels and cable vertical guides (as an option).

OSMOSE AND BURONOMIC

The Osmose line is manufactured in France (Honfleur, Calvados) in an ISO9001-V2000 certified factory. Osmose is covered by a 5-year manufacturer guarantee. The entire Osmose range is available on a quick delivery times basis.
